

Bantam 2000[®] Series LED

Low Bay Lighting

Typical Applications

Parking Garages

Warehousing

Manufacturing

Transportation

Stairwells

Mezzanines/Canopies

More than a wise choice for saving energy, Bantam 2000 Series LED luminaires and available retrofit kit are also a wise choice for covering a broad range of low-bay applications with superior lighting.

- + 5,000-lumen package replaces up to 150W HID
- + Optional retrofit kit makes it easy to upgrade existing HID units to LED. Takes less than 10 minutes to make the switch
- + Legendary Holophane borosilicate prismatic glass optics won't fade, discolor or otherwise degrade
- + The glass ensures light is distributed where it's needed while providing a comfortable viewing plane from below
- + Four optic forms make up the Bantam 2000 Series LED line: Enduralume[®], Prismalume[®], Prismatite[®] and Prismpack[®]

Bantam 2000® Series LED

Low Bay Lighting

ENDURALUME® OPTICS

- + Spun-aluminum reflector with tempered, prismatic glass bottom
- + Symmetrical, wide distribution provides 4.5% uplight and allows optimum luminaire spacing
- + UL Wet Location listed and IP65 rated
- + Ideal for mounting heights of 10' to 14'

PRISMALUME® OPTICS

- + Wide or medium distribution available with up to 20% uplight to eliminate dark ceilings
- + Tempered, prismatic-glass bottom closure
- + UL Wet Location listed
- + Ideal for mounting heights of 14' to 18'

PRISMATITE® OPTICS

- + Choice of symmetric or long/narrow distribution with uplight for superior vertical illumination
- + Meets IESNA recommendations for parking structures
- + UL Wet Location listed and IP65 rated
- + Ideal for mounting heights of 10' to 14'

PRISMPACK® OPTICS

- + Spun-on anodized aluminum covers tempered, prismatic-glass reflector
- + Wide or medium distribution available that maximize horizontal illumination
- + UL Wet Location listed and IP65 rated
- + Ideal for mounting heights of 14' to 18'
